SIGNATURE OF APPLICANT, ATTORNEY, OR AGENT

Firm or Individual Name	MICHAEL G. JOHNSTON MOORE & VAN ALLEN
Signature	
Date	September 17, 2004

CERTIFICATE OF TRANSMISSION/MAILING

I hereby certify that this correspondence is being facsimile transmitted to the USPTO or deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 on the date shown below.			
Typed or printed name	Laura McCullen		
Signature		Date	September 17, 2004

This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

INFORMATION DISCLOSURE STATEMENT
UNDER 37 C.F.R. § 1.56 AND 37 C.F.R. § 1.97

It is respectfully requested that the documents listed on the attached Form PTO/SB/08A be considered by the Patent and Trademark Office in the above-referenced application and made of record therein. Full text copies of the relevant documents are enclosed.

Pursuant to 37 C.F.R. § 1.98 (a) (3) (i), a concise explanation of the relevance of each reference that is not in English follows:

B. DE 3816949 A1- Is concerned with a method for monitoring thickness of brake linings of disc brakes. A distance sensor (WA) is arranged at a caliper the measured values of the distance sensors (WA) of each shoe of the caliper (BZ) are compared and the uniform wear of the brake linings is controlled. The evaluation of the measured values of the distance sensors (WA) is made by a microcomputer μ C (Fig. 3). The microcomputer is connected to a mileage recorder (mileage counter) (KZ) and the mileage at which new brake linings are inserted, is stored. Depending on the stored mileage and the wear of the brake linings in relation to the mileage of the next check the resulting mileage of the brake linings is calculated by linear extrapolation. Thus, only the mileage when the brake linings are substituted is stored in the microcomputer.

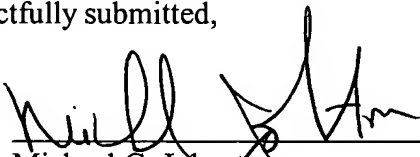

C. DE 3348387 C2 - Refers to a method for securing the operation of brakes with brake linings undergoing wear. The amounts of wear of at least two brakes (1, 2) during the same braking operation are compared with each other. In case of a difference between said

amounts of wear the braking pressure of at least one of the brakes (1, 2) is corrected to compensate the difference in the amounts of wear.

D. EP 0 934859 A1 - Refers to a device for controlling the brake power proportioning (brake power distribution) with a vehicle having three or more axles. Actuators are arranged for each brake such that by a control unit 23 the operating forces (actuating forces) are distributed by means of the actuators. The electronic or electromechanical sensors are provided for each brake or axle and deliver electric output signals containing information about the wear of the brakes which can be evaluated by the electronic control unit. The purpose of this device is to improve the distribution of the braking force to harmonize the wear of the brake such that a harmonization of the wear in relation to the brakes of permanent loaded axles is possible with respect for an auxiliary axle which may be loaded or unloaded. In short terms, this device is used with trucks having a front axle (VA) and a rear axle (HA) as well as an auxiliary axle (ZA). For actuating the brakes 11 to 14 and 16, 17 actuators 18₁ to 18₆ are provided.

Respectfully submitted,

By:

Michael G. Johnston
